

RFP 8 General Clarifications

General notes for all sites:

- All connections from a site to NWAX must be routable (layer 3) connections that include NWAX Peering with all other vendors/sites as defined in the RFP7 document. No Layer 2 connection to NWAX are acceptable. Global internet connectivity is not a requirement for this portion of the build unless specifically requested by the site.
- Site to site interconnects or connections that do not terminate at NWAX can be bid as a layer 2 connection. Please clearly identify this on all pricing documents.
- If a site is requesting both connectivity to OHN at NWAX and DIA (aka. global internet connectivity) there will be three general scenarios:
 - A request for connectivity to OHN at NWAX **AND** x Mbps **ADDITIONAL** global internet connectivity would mean that the total bandwidth requested would be the OHN connection bandwidth + the requested Internet bandwidth. All connections to other OHN members **MUST** prefer the connection via NWAX as stated in the RFP.
 - **Example:** "10 Mbps routed connection to NWAX (includes NWAX peering) and 10 Mbps additional global internet connectivity." This would be a total of 20 mbps of bandwidth requested.
 - A request for connectivity to OHN at NWAX **WITH** or **INCLUDING** x Mbps of global internet connectivity would mean the total bandwidth requested would be represented by the OHN connectivity, but only the specified number of Mbps of global internet connectivity would actually require global internet access. The rest of the bandwidth would only require routing to NWAX and peering at NWAX. All connections to other OHN members **MUST** prefer the connection via NWAX as stated in the RFP.
 - **Example 1:** "10 Mbps routed connection to NWAX (includes NWAX peering) including global internet connectivity." This would be a 10 Mbps port with full access/routing via public Internet or NWAX depending on the destination of the packet.
 - **Example 2:** "100 Mbps routed connection to NWAX (includes NWAX peering) with 10 Mbps of global internet connectivity." This would be a total of 100 mbps of bandwidth requested but only 10 Mbps would require global internet connectivity.
- In the spreadsheet below, all **highlighted** cells represent a change or new request. All others represent clarified wording.

Oregon Health Network RFP #8

No.	Site Name	Street Address	City	County	State	Zip	Prime Contact Name	Email address	Phone	Tech Contact Name	Email address	Phone	Service Requested	Other Requirements
1	Coastal Family Health Center	2158 Exchange Street,	Astoria	Clatsop	OR	97103	James K Coffee	jim@coastalfhc.org	503-325-8315	James K Coffee	jim@coastalfhc.org	503-325-8315	10 Mbps routed connection to NWAX (includes NWAX peering as stated in OHN RFP 8) including global internet connectivity	
2	Coquille Valley Hospital District	940 East 5th	Coquille	Coos	OR	97423	Dennis Zielinski	dennisz@cvhospital.org	541-396-3101	Curt Carpenter	mit@cvhospital.org	541-396-7982	<p>Request 1: 50 Mbps routed connection to OHN at NWAX (includes NWAX peering as stated in OHN RFP 8) and 10 Mbps of additional global Internet connectivity.</p> <p>Request 2: 100 Mbps routed connection to OHN at NWAX (includes NWAX peering as stated in OHN RFP 8) and 10 Mbps of additional global Internet connectivity.</p>	Comparative Bid
3	Curry General Hospital	94220 Fourth Street	Gold Beach	Curry	OR	97444	William I McMillan	bmcmillan@curryhealth.org	541-247-3108	Chris Creighton	ccreighton@curryhealth.org	541-247-3171	<p>Request 1: 100 Mbps routed connection to OHN at NWAX (includes NWAX peering as stated in OHN RFP 8) and 100 Mbps of additional global Internet connectivity.</p> <p>Request 2: 1 Gbps routed connection to OHN at NWAX (includes NWAX peering as stated in OHN RFP 8) with 100 Mbps of global Internet connectivity.</p>	Comparative Bid
